

WP5 steering meeting, 14 June 2013

Participants: Kurt Aulenbacher, Marica Biagini, Giuliano Franchetti, Mohammad Eshraqi, Catia Milardi, Ulla van Rienen, Frank Zimmermann, Mikhail Zobov

Topics; web sites, e-groups, workshops, outreach movie

Very rough notes:

Web site- Common web site with subpage – looking for help through Agnes Szeberenyi and/or from US summer students

e-groups can be reached at

<http://mmm.cern.ch>

then going to

search for e groups

and enter e.g. “eucard2-wp5” to get all mailing lists related to WP5.

Marica Biagini who recently joined the coordinator team should be given access.

The important e-groups, for us, are those with “info” at the end of the name, e.g. “...WP5.2-info” should contain email addresses of persons who should be informed about events of WP5.2.

Possible **workshops** for each task were discussed. WP5.5 could/would try to co-sponsor existing workshops on polarized beams and also organize topical 1 or 1.5 day brainstormings. Mainz was suggested as one possible location. Another possibility may be Bonn.

WP5.3 could organize events at GSI, RAL, PSI and CERN (the four main labs for intense hadron beams). WP5.4 XLINAC would certainly organize events at ESS. Maybe MYRRHA (if continued), CERN, DESY, PSI, (Bilbao?) etc. could be other possible locations.

The possibility of an **outreach movie** was considered. One contact to a film director (Filmhochschule Muenchen) could be through Jens Stadlmann.

Presentations were given by Kurt Aulenbacher, Mamad Eshraqi, Giuliano Franchetti and Frank Zimmermann describing plans and tentative scope for the various WP5 tasks.

Reported by Frank Zimmermann
